

Drug-Free Workplace Policy

DRUG, ALCOHOL, and SUBSTANCE ABUSE POLICY STATEMENTS

Federal law requires the school to notify all employees and students of certain information about the unlawful possession, use, or distribution of illicit drugs and alcohol on its property or as part of its activities. The information included in this section of the report complies with the Drug-Free Schools and Communities Act and the Drug-Free Workplace Act of 1988 and all relevant implementing regulations.

A. Drug-Free Workplace Policy

The school prohibits being under the influence of, the unlawful manufacture, distribution, dispensing, possession of, or use of a controlled substance in the workplace, on school property, or as part of any school activity.

The school similarly prohibits being under the influence, the unlawful use, possession, and distribution of alcohol in the workplace, on school property, or as part of any school activity, as well as any other unlawful conduct involving alcohol. This policy applies to individuals of any age.

For sanctions related to drugs and alcohol, please see the below section.

B. Enforcement of State Underage Drinking and the Enforcement of Federal and State Drug Laws

The school does not maintain commissioned law enforcement, but all underage drinking and violations of State of Idaho' drug laws will be referred to the appropriate local law enforcement agencies.

C. Federal, State, and Local Legal Sanctions related to the unlawful possession or distribution of Illicit Drugs and Alcohol

The following information is taken from the Idaho Law. Please note that these definitions are provided for informational purposes only, and while the school works to keep this document up to date, there may be additional laws or changes to the laws included here.

Idaho State and Local Laws related to Controlled Substances, Drug, and Alcohol Penalties

These laws were current as of the publication of this report. We always recommend reviewing the current laws and regulations on the State of Idaho's pages. Additionally, these are general penalties, there may be additional information or aggravating factors that change the penalties faced for illegal activities.

Alcohol

Drug-Free Workplace Policy

Violation	Legal Citation	Penalty / Classification
Open Container (In a Motor Vehicle)	Idaho Code § 23-505	Misdemeanor for the driver or person in actual physical control. Infraction for passengers. <i>(Exceptions apply to passengers in commercial transport or RV living spaces).</i>
Public Intoxication (On a Highway/Roadway)	Idaho Code § 49-1426	It is a misdemeanor for an intoxicated pedestrian to walk on a public highway or road (outside of a sidewalk) if they present a safety hazard.
Public Intoxication (General Disturbances)	Varies by municipality / Idaho Code § 18-6409	State law protects individuals from incarceration purely for being drunk. However, if intoxication leads to a public disturbance, individuals are cited under local city codes or state Disturbing the Peace/Disorderly Conduct laws.
Underage Purchase, Consumption, or Possession	Idaho Code § 23-604	First violation is an infraction (\$300 fine); subsequent convictions are a misdemeanor with up to 2 years of driver's license suspension.
Dispensing Alcohol to a Minor	Idaho Code § 23-603	Misdemeanor ; carrying a mandatory fine of \$500 to \$1,000 per violation.

Driving Under the Influence

Offense Type	Legal Citation	Classification	Jail / Prison Time	Fine	License Suspension
Standard DUI (1st Offense)	Idaho Code § 18-8004, § 18-8005(1)	Misdemeanor	Up to 6 months	Up to \$1,000	90 to 180 days (30 days absolute, then restricted)
Standard DUI (2nd within 10 years)	Idaho Code § 18-8005(4)	Misdemeanor	10 days to 1 year (mandatory minimum 10 days)	Up to \$2,000	1 year absolute suspension

Drug-Free Workplace Policy

Standard DUI (3rd within 10 years)	Idaho Code § 18-8005(6)	Felony	30 days to 5 years (or up to 10 years prison depending on specifics)	Up to \$5,000	1 to 5 years
Excessive DUI (0.20% BAC or higher, 1st offense)	Idaho Code § 18-8005(5)	Misdemeanor	10 days to 1 year (mandatory minimum 10 days)	Up to \$2,000	Mandatory minimum 1 year
Repeat Excessive DUI (within 5 years)	Idaho Code § 18-8005(9)	Felony	Up to 5 years state correctional custody	Up to \$5,000	1 to 5 years
Aggravated DUI (causing great bodily harm/injury)	Idaho Code § 18-8006	Felony	Up to 15 years imprisonment	Up to \$5,000	1 to 5 years post-imprisonment

Possession of Drugs or Controlled Substances

Substance Category / Type	Legal Classification	Maximum Penalty	Legal Citation
Schedule I Narcotics & Schedule II Substances (e.g., heroin, cocaine, methamphetamine, oxycodone)	Felony	Up to 7 years imprisonment and/or a \$15,000 fine	Idaho Code § 37-2732(c)(1)
LSD (Lysergic acid diethylamide)	Felony	Up to 3 years imprisonment and/or a \$5,000 fine	Idaho Code § 37-2732(c)(2)
Other Schedule I Non-Narcotics & Schedules III–VI Substances (e.g., certain prescription pills, minor depressants/stimulants)	Misdemeanor	Up to 1 year in county jail and/or a \$1,000 fine	Idaho Code § 37-2732(c)(3)
Marijuana (more than 3 ounces net weight)	Felony	Up to 5 years imprisonment and/or a \$10,000 fine	Idaho Code § 37-2732(c)(1)(B)

Drug-Free Workplace Policy

Marijuana (3 ounces or less net weight)	Misdemeanor	Up to 1 year in county jail and/or a \$1,000 fine	Idaho Code § 37-2732(c)(3)
Being Under the Influence of specified controlled substances on public property	Misdemeanor	Up to 6 months in jail and/or a \$1,000 fine	Idaho Code § 37-2732C

Distribution of Manufacture of Drugs or Controlled Substances

Offense / Substance Schedule	Classification	Maximum Penalty	Legal Citation
Schedule I Narcotic / Schedule II (Manufacture or Delivery)	Felony	Up to life imprisonment, \$25,000 fine	Idaho Code § 37-2732(a)(1)(A)
Schedule I Non-Narcotic / Schedule III (Manufacture or Delivery)	Felony	Up to 5 years imprisonment, \$15,000 fine	Idaho Code § 37-2732(a)(1)(B)
Schedule IV (Manufacture or Delivery)	Felony	Up to 3 years imprisonment, \$10,000 fine	Idaho Code § 37-2732(a)(1)(C)
Schedule V / Schedule VI (Manufacture or Delivery)	Misdemeanor	Up to 1 year imprisonment, \$5,000 fine	Idaho Code § 37-2732(a)(1)(D)
Marijuana (>3 ounces manufacture/delivery)	Felony	Up to 5 years imprisonment, \$10,000 fine	Idaho Code § 37-2732(a)(1)(B)
Marijuana (≤3 ounces delivery/not for profit)	Misdemeanor	Up to 1 year imprisonment, \$1,000 fine	[Idaho Code § 37-2732(c)]
Counterfeit Schedule I Narcotic / Schedule II	Felony	Up to 15 years imprisonment, \$25,000 fine	[Idaho Code § 37-2732(a)(1)(C)]
Prohibited Acts by Registrant (Fictitious numbers, unauthorized distribution)	Felony	Up to 4 years imprisonment, \$30,000 fine	Idaho Code § 37-2734
Manufacture/Delivery with Child Present	Felony	Up to 5 years imprisonment, \$5,000 fine	Idaho Code § 37-2737A

Drug-Free Workplace Policy

Possession, Distribution, or Manufacture of Drug Paraphernalia

Offense / Conduct	Legal Citation	Classification	Maximum Penalties
Use or Possession with intent to use drug paraphernalia, or advertising the sale of paraphernalia.	Idaho Code Ann. § 37-2734A	Misdemeanor	Up to 1 year imprisonment, a fine up to \$1,000 , or both.
Manufacture, Delivery, or Possession with Intent to Deliver drug paraphernalia knowing it will be used for controlled substances.	Idaho Code Ann. § 37-2734B	Felony	Up to 9 years imprisonment, a fine up to \$30,000 , or both.

Note on Marijuana:

While Marijuana is illegal in Idaho, due to the recreational and medical availability in adjacent states we would like to note under federal law it is unlawful for a person to knowingly or intentionally possess marijuana, a Schedule 1 Substance. As the school is a federally funded institution, the school prohibits use and/or possession in the school environment. School disciplinary action will be faced, up to and including termination under the Future Professional Advisory Policy or under the appropriate employment action.

Controlled Substances Act(Federal):

The Controlled Substances Act classifies regulated substances under existing federal law into one of five categories, known as Schedules. The assigned Schedule is based on substance characteristics like medical use, potential for abuse, and safety or dependence ability. Below is a description of the five Schedules and examples of substances in each schedule. This is not a comprehensive list.

Please note that a substance need not be listed as a controlled substance to be treated as a Schedule I substance for criminal prosecution. A controlled substance analogue is a substance which is intended for human consumption and is structurally or pharmacologically substantially similar to or is represented as being similar to a Schedule I or Schedule II substance and is not an approved medication in the United States. (See 21

Drug-Free Workplace Policy

U.S.C. §802(32)(A) for the definition of a controlled substance analogue and 21 U.S.C. §813 for the schedule.)

Schedule I

Schedule I drugs, substances, or chemicals are defined as drugs with no currently accepted medical use and a high potential for abuse. Some examples of Schedule I drugs are: heroin, lysergic acid diethylamide (LSD), marijuana (cannabis), 3,4-methylenedioxymethamphetamine (ecstasy), methaqualone, and peyote.

Schedule II

Schedule II drugs, substances, or chemicals are defined as drugs with a high potential for abuse, with use potentially leading to severe psychological or physical dependence. These drugs are also considered dangerous. Some examples of Schedule II drugs are: combination products with less than 15 milligrams of hydrocodone per dosage unit (Vicodin), cocaine, methamphetamine, methadone, hydromorphone (Dilaudid), meperidine (Demerol), oxycodone (OxyContin), fentanyl, Dexedrine, Adderall, and Ritalin.

Schedule III

Schedule III drugs, substances, or chemicals are defined as drugs with a moderate to low potential for physical and psychological dependence. Schedule III drugs abuse potential is less than Schedule I and Schedule II drugs but more than Schedule IV. Some examples of Schedule III drugs are: products containing less than 90 milligrams of codeine per dosage unit (Tylenol with codeine), ketamine, anabolic steroids, and testosterone.

Schedule IV

Schedule IV drugs, substances, or chemicals are defined as drugs with a low potential for abuse and low risk of dependence. Some examples of Schedule IV drugs are: Xanax, Soma, Darvon, Darvocet, Valium, Ativan, Talwin, Ambien, and Tramadol.

Schedule V

Schedule V drugs, substances, or chemicals are defined as drugs with lower potential for abuse than

Schedule IV and consist of preparations containing limited quantities of certain narcotics. Schedule V drugs are generally used for antidiarrheal, antitussive, and analgesic purposes. Some examples of Schedule V drugs are: cough preparations with less than 200 milligrams of codeine or per 100 milliliters (Robitussin AC), Lomotil, Motofen, Lyrica, and Parepectoli.

Federal Trafficking Penalties*

Drug/Schedule	Quantity	Penalties	Quantity	Penalties
Cocaine (Schedule II)	500–4,999 grams mixture	First offense: Not less than five years, and not more than 40 years. If death or	5 kilograms or more mixture	First offense: Not less than 10 years, and not more than life imprisonment. If death or serious injury, not less
Cocaine Base (Schedule II)	28–278 grams mixture		279 grams or more mixture	

Drug-Free Workplace Policy

Fentanyl (Schedule II)	40–399 grams mixture	serious injury, not less than 20 years or more than life imprisonment. Fine of not more than \$2 million if an individual, \$5 million if not an individual. Second offense: Not less than 10 years, and not more than life imprisonment. If death or serious injury, life imprisonment. Fine of not more than \$4 million if an individual, \$10 million if not an individual.	400 grams or more mixture	than 20 years or more than life imprisonment. Fine of not more than \$4 million if an individual, \$10 million if not an individual. Second offense: Not less than 20 years, and not more than life imprisonment. If death or serious injury, life imprisonment. Fine of not more than \$8 million if an individual, \$20 million if not an individual. Two or more prior offenses: Life imprisonment
Fentanyl Analogue (Schedule I)	10–99 grams mixture		100 grams or more mixture	
Heroin (Schedule I)	100–999 grams mixture		1 kilogram or more mixture	
LSD (Schedule I)	1–9 grams mixture		10 grams or more mixture	
Methamphetamine (Schedule II)	5–49 grams pure or 50–499 grams mixture		50 grams or more pure or 500 grams or more mixture	
PCP (Schedule II)	10–99 grams pure or 100–999 grams mixture		100 grams or more pure or 1 kilogram or more mixture	
Penalties				
Other Schedule I and II Drugs (and any drug product containing Gamma Hydroxybutyric Acid)	Any amount	First offense: Not more than 20 years. If death or serious injury, not less than 20 years, or more than life imprisonment. Fine \$1 million if an individual, \$5 million if not an individual. Second offense: Not more than 30 years. If death or serious injury, not less than life imprisonment. Fine \$2 million if an individual, \$10 million if not an individual.		
Flunitrazepam (Schedule IV)	1 gram or more			
Other Schedule III Drugs	Any amount	First offense: Not more than five years. Fine not more than \$250,000 if an individual, \$1 million if not an individual. Second offense: Not more than 10 years. Fine not more than \$500,000 if an individual, \$2 million if not an individual.		
Flunitrazepam (Schedule IV)	30 to 999 milligrams			

Drug-Free Workplace Policy

All Other Schedule IV Drugs	Any amount	First offense: Not more than three years. Fine not more than \$250,000 if an individual, \$1 million if not an individual.
Flunitrazepam (Schedule IV)	Less than 30 milligrams	Second offense: Not more than six years. Fine not more than \$500,000 if an individual, \$2 million if not an individual.
All Schedule V Drugs	Any amount	First offense: Not more than one year. Fine not more than \$100,000 if an individual, \$250,000 if not an individual. Second offense: Not more than two years. Fine not more than \$200,000 if an individual, \$500,000 if not an individual.

Federal Trafficking Penalties — Marijuana*

Drug	Quantity	First Offense	Second Offense
Marijuana	1,000 kilograms or more mixture; or 1,000 or more plants	• Not less than 10 years, not more than life imprisonment. • If death or serious injury, not less than 20 years, not more than life imprisonment. • Fine not more than \$4 million if an individual, \$10 million if other than an individual.	• Not less than 20 years, not more than life imprisonment. • If death or serious injury, mandatory life imprisonment. • Fine not more than \$8 million if an individual, \$20 million if other than an individual.
Marijuana	100 kilograms to 999 kilograms mixture; or 100 to 999 plants	• Not less than five years, not more than 40 years. • If death or serious injury, not less than 20 years, not more than life imprisonment. • Fine not more than \$2 million if an individual, \$5 million if other than an individual.	• Not less than 10 years, not more than life imprisonment. • If death or serious injury, mandatory life imprisonment. • Fine not more than \$4 million if an individual, \$10 million if other than an individual.
Marijuana	more than 10 kilograms hashish; 50 to 99 kilogram mixture more than 1 kilogram of hashish oil; 50 to 99 plants	• Not more than 20 years. • If death or serious injury, not less than 20 years, not more than life imprisonment. • Fine \$1 million if an individual, \$5 million if	• Not more than 30 years. • If death or serious injury, mandatory life imprisonment. • Fine \$2 million if an individual, \$10 million

Drug-Free Workplace Policy

		other than an individual.	if other than an individual.
Marijuana	1 to 49 plants; less than 50 kilogram mixture	• Not more than five years. • Fine not more than \$250,000, \$1 million if other than an individual.	• Not more than 10 years. • Fine \$500,000 if an individual, \$2 million if other than an individual.
Hashish	10 kilograms or less		
Hashish Oil	1 kilogram or less

**From the US Drug Enforcement Administration.*

D. Statement on Disciplinary Sanctions

The school will impose disciplinary sanctions on students and employees, or may remove guests from the premises, who violate the Drug-Free Workplace Policy or other policies that prohibit the use, possession, manufacture or distribution of drug and alcohol. Individuals found to be in violation of this policy will be subject to sanctions up to and including termination from the educational program via the Future Professional Advisory Policy or the Termination of Employment and referral to the appropriate agency for prosecution.

The drug-free workplace consists of all locations where the school does business. This includes, but is not limited to, all lecture classrooms, parking lots, all administrative offices, corridors, storage rooms, and any space added to the school or school property.

E. Health Risks

The abuse of narcotics, depressants, stimulants, hallucinogens, or alcohol can cause serious detriment to a person's health. The health risks associated with the misuse of the previously mentioned drugs vary, but may include, and are not limited to: convulsions, coma, paralysis, irreversible brain damage, tremors, fatigue, paranoia, insomnia, and possible death. Drug and alcohol abuse is extremely harmful to a person's health and interferes with productivity and alertness. Working while under the influence of drugs or alcohol could be a danger to the individual under the influence, coworkers, and students. Described below are additional dangers and symptoms relative to use and/or abuse.

Marijuana

Commonly known as "pot," marijuana is a plant with the botanical name of cannabis sativa. Pot is almost always smoked but can be ingested. Use causes the central nervous system to become disorganized and confused. Most users experience an increase in heart rate, reddening of eyes, and dryness of the throat and mouth.

Studies have proven that marijuana's mental effects include temporary impairment of short-term memory and an altered sense of time. It also reduces the ability to perform tasks requiring concentration, swift reactions, and coordination. Feelings of euphoria, relaxation, and bouts of exaggerated laughter are also commonly reported.

Ingesting marijuana, including by smoking, vaping, or eating, may cause: brain chemical changes, an altered reality, physically damaged lungs, emphysema, chronic bronchitis, lung

Drug-Free Workplace Policy

cancer, a weakened immune system, damage to sperm in males, irregular menstrual cycles in females, and reduced fertility and sex drive.

Regardless whether or not the state allows the use of marijuana or medical marijuana, at the federal level, marijuana remains classified as a Schedule I substance under the Controlled Substances Act, in which Schedule I substances are considered to have a high potential for dependency and no accepted medical use, making distribution or use of marijuana a federal offense. Therefore, regardless of the circumstance, marijuana cannot be brought to or used on the school's campus.

Cocaine/Crack

Cocaine is a stimulant drug, which is derived from the coca plant. Street cocaine is available in the form of a powder or a "rock" of crack and is most commonly inhaled or smoked. Cocaine increases the heart rate and blood pressure and is highly addictive.

Crack is a form of smokable cocaine named for the popping sound it makes when burned. It is a mixture of cocaine, baking soda, and water. It is 5–10 times more potent than cocaine and is extremely harmful. It has been reported that addiction can occur with as few as two "hits." Some symptoms of cocaine/crack abuse are: personality changes; unexplained weight loss; excess sniffing and coughing; insomnia; depression; irritability; neglect of responsibility toward work, school, family, and friends; and panic attacks.

Alcohol

In small amounts, alcohol has a tranquilizing effect on most people, although it appears to stimulate others. Alcohol first acts on those parts of the brain that affect self-control and other learned behaviors; lowered self-control can lead to aggressive behavior. Alcohol use can also cause dehydration, coordination problems, and blurred vision.

In large amounts, alcohol can dull sensation and impair muscular coordination, memory, and judgment. Taken in larger amounts over a long period of time, alcohol can damage the liver, heart, and brain, and cause numerous other health and medical issues.

When anyone under age 21 drinks alcohol, it is considered underage drinking. Underage drinking is against the law, except in special cases, such as when it is part of a religious ceremony. Underage drinking is also dangerous. It can harm the mind and body of a growing adolescent in ways many people don't realize. If caught by the police, you may be arrested, lose your driver's license, or be required to attend an alcohol awareness program. If a student is caught drinking on the school's campus or at a school-sponsored event, the student will be terminated from school.

Hallucinogens

Hallucinogens are also known as psychedelics. The effects vary; a user's reactions can vary by occasion. Most users are affected by changes in time and space perception, delusions, and hallucinations. The effects may be mild or overwhelming, depending on the dose and quantity or the drug.

Drug-Free Workplace Policy

Physical reactions range from minor changes, such as dilated pupils or an increase in temperature and heartbeat, to major changes, such as tumors. High doses can significantly alter the state of consciousness. After taking a hallucinogenic drug, the user loses control of thought processes. Although many perceptions are benign, others may cause panic or may make the user believe he or she cannot be harmed. Such delusions can be dangerous.

Heroin

Heroin is a narcotic, which relieves pain and induces sleep. Commonly known as “junk” or “smack,” heroin is a highly addictive depressant and has been attributed as the cause of many deaths. Symptoms include “pin-point pupils”; drowsiness, lethargy, and slurred speech; and an inability to concentrate. Related medications used to treat pain include oxycontin and oxycodone, methadone, and codeine. The abuse of painkillers ranks second only to the abuse of marijuana in the United States. Heroin users experience a higher rate of infectious disease due to a weakened immune system and sharing contaminated needles. Children can be born addicted or can become addicted as a result of heroin in the mother’s breast milk.

Crystal Methamphetamine

Crystal methamphetamine is a colorless, odorless, powerful, and highly addictive synthetic (man-made) stimulant.

Crystal methamphetamine typically resembles small fragments of glass or shiny blue-white “rocks” of various sizes. Like powdered methamphetamine, crystal methamphetamine produces long-lasting euphoric effects. Crystal methamphetamine, however, typically has a higher purity level and may produce even longer-lasting and more intense physiological effects than the powdered form of the drug.

Crystal methamphetamine use is associated with numerous serious physical problems. The drug can cause rapid heart rate, increased blood pressure, and damage to the small blood vessels in the brain, which can lead to stroke. Chronic use of the drug can result in inflammation of the heart lining. Overdoses can cause hyperthermia (elevated body temperature), convulsions, and death.

Crystal methamphetamine users may experience episodes of violent behavior, paranoia, anxiety, confusion, and insomnia. The drug can produce psychotic symptoms that persist for months or years after an individual has stopped using the drug.

Crystal methamphetamine users who inject the drug expose themselves to additional risks, including contracting HIV (human immunodeficiency virus). Methamphetamine users also risk scarred or collapsed veins, infections of the heart lining and valves, abscesses, pneumonia, tuberculosis, and liver or kidney disease.

Depressants

Depressants are highly addictive; they are usually known as “downers.” A user may be drowsy and lethargic, suffer from memory loss, and have slurred speech. Many lawful drugs that have characteristics of depressants are from the family of drugs called barbiturates. More serious

Drug-Free Workplace Policy

effects of the abuse of downers are liver damage, paradoxical anxiety and excited rage, coma, and death.

Ecstasy (MDMA)

Also known as XTC, X, and E, Ecstasy is a mind-altering drug with hallucinogenic and speed-like side effects. Often used at raves, it is taken to promote loss of inhibition, excitability, euphoria, energy, and sexual stimulation. Ecstasy increases the amounts of serotonin in the user's brain, which causes increased energy and euphoria; it also contains anti-coagulative properties, which can cause the user to bleed to death if injured. Ecstasy can also cause serious brain damage in a short time. Side effects of ecstasy include: depression, increased heart rate and blood pressure, muscle tension, nausea, blurred vision, faintness, chills, brain damage, organ damage, and death. Similar "designer drugs" include MDEA and MDA (also known as "Adam" and "Eve").

Ritalin

Methylphenidate (Ritalin) is a medication prescribed for individuals (usually children) who have an abnormally high level of activity or attention-deficit hyperactivity disorder (ADHD). It contains amphetamines and can be abused as a stimulant by those for whom it is not prescribed. When abused, the tablets are either taken orally or crushed and snorted. Some abusers dissolve the tablets in water and inject the mixture — complications can arise from injection as insoluble fillers in the tablets can block small blood vessels.

GHB

Gamma-hydroxybutyrate is an intoxicating chemical with medical, recreational, and potentially dangerous uses. Its use is illegal for any purpose in the United States. Nicknamed the "date rape drug," it is a clear liquid often mixed in drinks to promote relaxation or increased sociability. When taken, side effects can include: drowsiness, dizziness, vomiting, amnesia, decreased motor skills, slurring of speech, unrouseable sleep (coma), and death. GHB was used as a dietary supplement until banned by the FDA. GHB is now illegal in the United States. Common slang names for GHB are: G, Liquid X, GBH, Gamma-oh, Blue Verve, Grievous Bodily Harm, Goop, and EZLay.

Drug Conviction Notification and Imposed Sanctions:

- Any employee or student must notify Paul Mitchell the School Austin of any criminal drug statute conviction for a violation occurring in the workplace no later than **five** days after such a conviction.
- Within 30 days after receiving notice of an employee or student conviction will impose corrective measures on the employee or student convicted of drug abuse violations in the workplace by:
 - Taking appropriate action against the employee or student up to and including expulsion or termination of employment and referral for prosecution and/or
 - Requiring such employee or student to participate satisfactorily in a drug abuse assistance or rehabilitation program approved for such purposes by a federal, state, or local health, law enforcement, or other appropriate agency.

G. Materials used to provide drug and alcohol abuse programming to students and staff:

In addition the below policy distribution procedures, the School uses the Vector Solutions platform to assign training to students and employees in support of the educational programming. Upon enrollment or employment, students and employees are assigned training on the Vector Solutions platform. For students and employees, this includes modules on alcohol and drugs.

H. Policy Distribution Procedures:

Paul Mitchell the School Austin's Drug-Free Workplace Policy will be distributed to all employees and students on an annual basis using the following procedure:

Drug-Free Workplace Policy

- Students will receive a copy of the Drug-Free Workplace Policy at the time of initial enrollment. The student will sign an acknowledgement for the receipt of the Drug-Free Workplace Policy.
- Staff employees will receive a copy of the Drug-Free Workplace Policy with the initial employment documentation. The School requires the employee to read the Policy, and the signature page will be returned with the employment documentation. Annually the School Director or designee will be responsible for distributing the policy to current staff employees.

I. Biennial Review

The school conducts a biennial review of its Drug-Free Workplace Policy to determine the program's effectiveness, any needed changes, the number of drug- and alcohol-related violations and fatalities, and the number and type of sanctions imposed. Contact the School Director to request a copy of the biennial review.
